Be prepared for any situation.

Air Wedge®

The original and still the best!

From its introduction in 1996, HPC's Air Wedge® revolutionized car opening. Simply slide it between the door and the frame of the vehicle, squeeze the bulb a few times to inflate the Air Wedge® and safely spread the door from the frame. Then use any of HPC's innovative Through Car tools to easily manipulate door handles, switches and buttons to open most every vehicle on the road.
