Cylinder Eater™

The professional approach to drilling a lock, one tool defeats them all!

Even the best lock picker can be foiled by a broken spring, corroded pins or other obstructions in the cylinder. In these cases, the best solution is to drill the lock. With the specialized drill guides and the appropriate key blank, the Cylinder Eater™ gives you perfect drill alignment on the shear line. Whether you are faced with a heavy-duty commercial-grade cylinder, a standard residential cylinder or a padlock, the Cylinder Eater™ provides fast, easy and sure-fire drilling.
